

# SERVO-DRIVE Waste/recycle bin set

Perfecting motion 

## Added value

SERVO-DRIVE is the quickest and cleanest way to get rid of waste. When your hands are full, it is easy to open the waste/recycle bin drawer with your hip or knee. With SERVO-DRIVE, a light touch on the drawer front is all that's required and the drawer opens by itself. How and where the front is touched is not important. Thanks to BLUMOTION, drawers also close silently and effortlessly. Together SERVO-DRIVE and BLUMOTION offer the user a new freedom of motion.

## SERVO-DRIVE in your showroom

Now is the time to show SERVO-DRIVE to your customers so they can experience just how practical it is. The waste/recycle bin drawer with SERVO-DRIVE is the ideal solution in providing comfort to the kitchen user. The installation can be done during manufacturing or on site by an installer.
