

MINI BEAM STAKE & SHIELD

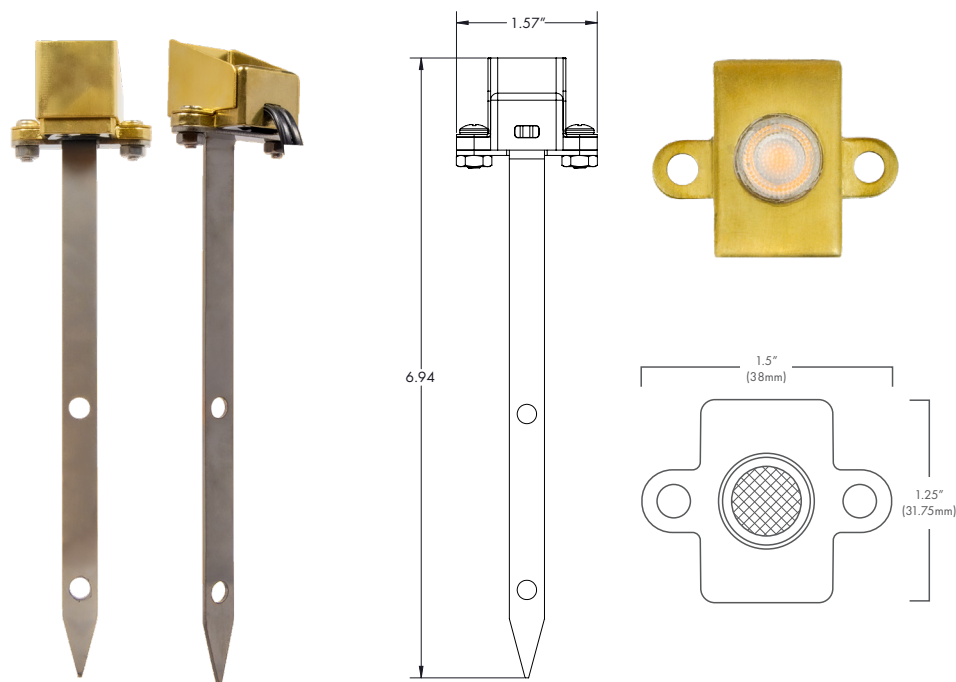

DESCRIPTION

The Mini Beam is the perfect lamp to bring light to hard-to-reach places, whether under water, in a water feature, under stairs, stone walls, stone lanterns, or any small space. This directional product solves the issue of fitting a fixture and a lamp into a small area. Enhanced ESD (Electro-Static Discharge) protection (IEC-61000-4-2). We recommend using LightingShrink connections for Mini Beams. Dimmable with Brilliance Dimmer and most magnetic transformers. Now packaged and pre-assembled with the Stake & Shield accessory. If your application calls for it, shape or bend the stake to optimize the light's aim.

MINI BEAM

| | |
|-----------------|---|
| Use | Fully Submersible in Water Features or Heavy Irrigation Areas Small Spaces that Need Directional Light |
